At the workplace and when out and about

Wera 2go 4 Tool Quiver

The large set-down area improves the stability of the Tool Quiver. Its large handle means that the quiver can be easily transported or simply hung up at the workplace.

Robust and dimensionally stable

The robust and dimensionally stable material is very resistant against cuts and stabs. The tools carried are protected against damage and moisture. This enhances the service life of the tool box.

Clever organisation

The variably adjustable hook and loop fastener partition in the Tool Quiver ensures neat and tidy arrangement of the tools.

Perfect system supplement

Thanks to its hook and loop fastener zone, the Tool Quiver can be docked with the Wera 2go 1 tool carrier and with the Wera 2go 2 tool container.

Lasertip prevents slipping out

It happens time and time again that the tip slips out of the screw head when screwdriving, sometimes damaging valuable surfaces or even causing injury. The tips of the Wera Lasertip screwdrivers are microscopically roughened by means of a laser. This rough surface literally "bites" itself firmly into the screw head. Slipping out becomes a thing of the past.

Individually tested

The individual testing at 10,000 volts, in accordance with IEC 60900, ensures safe working with loads up to 1,000 volts.

"Take it easy" Tool Finder

Colour coding according to profile and size stamp. This enables faster and more reliable selection of the correct tool from the tool case.
