**At the workplace and when out and about**

Wera 2go 4 Tool Quiver

The large set-down area improves the stability of the Tool Quiver. Its large handle means that the quiver can be easily transported or simply hung up at the workplace.

**Robust and dimensionally stable**

The robust and dimensionally stable material is very resistant against cuts and stabs. The tools carried are protected against damage and moisture. This enhances the service life of the tool box.

**Clever organisation**

The variably adjustable hook and loop fastener partition in the Tool Quiver ensures neat and tidy arrangement of the tools.

**Perfect system supplement**

Thanks to its hook and loop fastener zone, the Tool Quiver can be docked with the Wera 2go 1 tool carrier and with the Wera 2go 2 tool container.

**Lasertip prevents slipping out**

A precisely-focused laser creates a sharp-edged surface structure. Wera Lasertip "bites" itself into the screw head and prevents any slips out of the recess. It is available for screwdrivers for slotted, Phillips and Pozidriv screws.

**Individually tested**

The individual testing at 10,000 volts, in accordance with IEC 60900, ensures safe working with loads up to 1,000 volts.

**Take it easy Tool Finder**

Colour coding according to profile and size stamp. This enables faster and more reliable selection of the correct tool from the tool case.
