

1855 PZ Kraftform Ball-Grip Pozidriv-head screwdriver, PZ 2 x 100 mm

Kraftform Ball-Grip – Series 1800

EAN:	4013288222725	Size:	205x39x39 mm
Part number:	05007910001	Weight:	91 g
Article number:	1855 PZ	Country of origin:	CZ
		Customs tariff number:	82054000

- Screwdriver, for cross-recess screws, Pozidriv
- Kraftform series 1800 handle for high torques
- Soft handle zones for high power transmission
- Hard handle zones for palm pressure
- Handle recesses for your fingers allow fine adjustment
- Narrow transition between handle and blade for hard-to-reach and sunken screws in tight areas
- Take it easy tool finder: colour coding according to profile and size
- Lasertip tips for more secure fit in the screw head

Screwdriver with Kraftform series 1800 handle for Pozidriv screws. The handle fits perfectly in the hand. The convex shape allows the transmission of high torques. The soft handle zones ensure a good grip and low-loss power transmission. The hard handle zones allow a high power transmission, even when pressure is applied with the ball of the hand. The recesses at the upper end of the handle facilitate fine adjustment while screwdriving. Due to the narrow transition between handle and blade, even sunken screws in narrow areas can be easily reached. The anti-roll protection at the rear end of the handle hinders the tool from rolling away annoyingly at the workplace. The tips of Wera Lasertip screwdrivers are microscopically roughened with laser beams. This rough surface "bites" into the screw head which avoids unintentional slipping out of the screw.

Lasertip prevents slipping out

It happens time and time again that the tip slips out of the screw head when screwdriving, sometimes damaging valuable surfaces or even causing injury. The tips of the Wera Lasertip screwdrivers are microscopically roughened by means of a laser. This rough surface literally "bites" itself firmly into the screw head. Slipping out becomes a thing of the past.

Lasertip

A precisely-focused laser creates a sharp-edged surface structure. Wera Lasertip "bites" itself into the screw head and prevents any slips out of the recess. It is available for screwdrivers for slotted, Phillips and Pozidriv screws.

Reduced contact pressure

Wera Lasertip reduces the contact pressure required and enhances force transfer - meaning less screwdriving effort is required. Screwdriving becomes safer and easier.

Kraftform Ball-Grip for high torques

The ergonomically shaped Kraftform Ball-Grip fits perfectly in the hand. Its convex shape allows the transmission of high torque transfer.

Soft handle zones for high power transmission

The material used for the soft zones of the Kraftform Ball-Grip handle ensures a good grip and low-loss power transmission.

Hard handle zones for palm pressure

The hard handle zones of the Kraftform Ball-Grip allow high power transmission, even when pressure is applied with the ball of the hand.

Handle recesses for adjustment works

The recesses at the upper end of the Kraftform Ball-Grip allow fine adjustment while screwdriving.

For constricted screwdriving situations

Due to the narrow transition between handle and blade, even sunken screws in narrow areas can be easily reached.
