- 4-piece set
- For hexagon screw heads and bolts with wrench sizes 7.0; 8.0; 9.0; 10.0; 11.0; 12.0; 13.0; 14.0; 15.0; 16.0; 17.0; 18.0; 19.0 (metric)
- For hexagon screw heads and bolts with wrench sizes 1/4"; 5/16"; 3/8"; 7/16"; 1/2"; 17/32"; 9/16"; 19/32"; 5/8"; 11/16"; 3/4" (imperial)
- Automatically and continuously gripping hexagonal screws and bolts
- Lever mechanism upon gripping prevents slipping and damage
- With mechanical ratchet functionality for fast and consistent screwdriving without removing the spanner
- Return angle of only 30° through placement in the corner-width rectangular prisms in the open end

Many users wish to have a universal screwdriving tool with the widest possible range of applications. It should be a single tool for multiple metric and imperial dimensions. It should automatically adjust to the different screw sizes. It should be safe to grab without damaging anything and should allow for high working speeds. With its continuous and parallel jaws the Joker 6004 replaces several single spanner sizes. The required size is automatically and continuously set when attaching the tool to the hexagon bolt or screw. The integrated lever mechanism securely clamps the hexagon screw or bolt between the jaws, which significantly reduces the risk of slippage or damage. The ratchet feature ensures fast and consistent screwdriving without removing the tool. By using the corner-width rectangular prisms, a return angle of only 30° can be achieved. The single-arm design, in conjunction with the ratchet feature and the corner-width prism, makes it possible to work even in confined spaces. The adjustable Joker 6004 is the universal screwdriving tool. Self-setting. Gripping. Spanning. 4-piece set for at least 18 different metric and imperial screw drives, comes in a compact folding pouch. The Joker pouches are suitable for attachment to walls, shelves, workshop trolleys and the Wera 2go system thanks to the hook-and-loop fastener system on the back.

Joker 6004: automatically and continuously self-setting

The compact folding pouch with four adjustable Joker 6004 spanners covers all metric and imperial dimensions in applications from 7 to 19 mm or ¼" to ¾"

With its automatically and continuously gripping parallel jaws the Joker spanner 6004 covers all dimensions in the respective field of application. The tool automatically finds the required size when placed on the bolt or screw, no setting required.

Joker 6004: gentle to the screw

The parallel smooth jaws of the Joker 6004 allow surface pressure and can thus prevent rounding of the bolt or screw head, which can occur during power transmission via the corners.

Joker 6004: Ratchet mechanism for quick working

The ratchet feature in the jaw ensures fast and consistent screwdriving without removing the tool.

Joker 6004: low return angle

The corner-width rectangular prisms in the jaw allow a return angle of only 30°.
