Flexible-lock-system

On adaptors featuring the Flexible-Lock system, attachment tools can be permanently secured to the adaptor. If the system is deactivated, the attachment tools can be changed in a flash, as usual.

Knurling

Knurling on lower end for more grip when used manually.

Chrome vanadium steel

The connection parts are suitable for high loads thanks to their chrome-vanadium steel design.

Practical nonwoven strips

The textile belt can be attached by means of the nonwoven reverse side and the hook-and-loop strips e.g. to a wall, shelf, tool trolley and to the Wera 2go tool transport system.
