

- Upright positionable Bit-Checks convince due to their functionality in a minimum of space
- Holding function for TORX® screws
- Bit-Check plastic material ensures robustness and durability
- 50 mm-long bits

6 50 mm-long Wera TORX® bits tidily arranged in a minimum of space in a practical Bit-Check. The wedging forces resulting from the contact pressure between the drive tip and the screw profile securely hold the screw on the tool.

At the workplace

The HF profile

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

In tight assembly or disassembly situations, for example in engine compartments, it is not possible to securely hold the screw with the hand on the screwdriver, and the screw subsequently often gets lost. Lengthy searches or the loss of the screw (with the associated danger that could bring about) are the consequence. The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that the screw is securely held on the tool!

Set contents:

867/4 TORX® HF bits with holding function, TX 10 x 50 mm

1x	TX 10 x 50 mm
1x	TX 15 x 50 mm
1x	TX 20 x 50 mm
1x	TX 25 x 50 mm
1x	TX 30 x 50 mm
1x	TX 40 x 50 mm
