

# Bit-Check 6 TX Impaktor 1, 6 pieces

## Bit-Checks Impaktor

<b>EAN:</b>	4013288157744	<b>Size:</b>	70x65x12 mm
<b>Part number:</b>	05057693001	<b>Weight:</b>	70 g
<b>Article number:</b>	Bit-Check 6 TX Impaktor 1	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82079030

- Upright positionable, multi-component Bit-Check
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- "Take it easy" tool finder: colour coding according to profile and size

6 Wera Impaktor bits tidily arranged in a minimum of space in a practical Bit-Check. The Impaktor technology offers an above-average service life even under extreme circumstances thanks to the best possible utilisation of the material properties and the optimised geometry. The bit tip is coated with tiny diamond particles; this reduces the risk of any slipping out of the screw head thanks to the enhanced frictional resistance.

## Bit-Checks Impaktor

### At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

### Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

### Above-average service life

Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

### Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

## Bit-Checks Impaktor

### Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

### Reduced contact pressure

These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

### TriTorsion system

The combination of the double torsion zones in the Impaktor holder and the torsion zone in the Impaktor bit results in the so-called TriTorsion system.

### "Take it easy" tool finder system

The "Take it easy" Bit-Checks have bits with a sleeve which - from its colour (e.g. red = Phillips) and size designation - make it simple to access the right bit quickly.

## Bit-Check 6 TX Impaktor 1, 6 pieces

### Bit-Checks Impaktor

#### Set contents:

#### 867/4 IMP DC Impaktor TORX® bits, TX 20 x 50 mm

- 2x TX 20 x 50 mm
- 2x TX 25 x 50 mm
- 1x TX 30 x 50 mm
- 1x TX 40 x 50 mm
