Kraftform Kompakt with Ratchet Function - Fine tooth system for precision work.

## Kraftform Kompakt 80 A

Suitable for 6 mm Wera Vario blades. Ratchet, fine-tooth design for minimal return angle, switchover ring (right, locked, left), maximum torque of up to 50 Newton metres, 6 mm hexagon chuck.

## Fine-tooth design

Fine action 44 tooth system for precision work. Great time savings when screwdriving.

## Changing ratchet direction

Ergonomic design of the reverse direction switch.

## Fine adjustment work

Additionally, the lockable neutral position permits exact adjustment work without having to change the screwdriving direction every time. Lockable neutral position for fine adjustment work.

## Handle/interchangeable blade system

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

## Vario double-ended blades

The 6 mm double-ended blades of 175 mm length are out of high quality bit material which gives them a particularly long service life.

## Kraftform

The basic idea for the prototype of the Kraftform handle - that the hand should dictate the design - has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

## Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.
