- Upright positionable, multi-component Bit-Check
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Holder with ring magnet for holding longer and heavier screws

1 Impaktor holder with retaining ring and ring magnet, 9 Impaktor bits. The Impaktor technology offers an above-average service life even under extreme circumstances thanks to the best possible utilisation of the material properties and the optimised geometry; particularly suitable for use with customary impact drivers; holder with ring magnet for simple holding of longer and heavier screws, ideal for overhead work. The rough diamond-coating of the bits reduces the risk of a slipping out of the screw head thanks to the enhanced frictional resistance.

**At the workplace**

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

**Improved productivity**

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

**Above-average service life**

Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

**Impaktor-Bits**

For an above-average service life. Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

#### Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

#### Impaktor holder with ring magnet

The Impaktor holder with ring magnet additionally holds longer and heavier screws absolutely securely. This enables a speedy and dependable positioning of the screw. It is also ideal for above-head work. Should the magnet function not be required in a particular situation e.g. when working with metal, it can be extracted from the screwdriving area and can thereby be "disabled". Mainly used in manual power tool applications.

#### TriTorsion system

The combination of the double torsion zones in the Impaktor holder and the torsion zone in the Impaktor bit results in the so-called TriTorsion system.

#### Take it easy tool finder system

The Take it easy Bit-Checks have bits with a sleeve which - from its colour (e.g. red = Phillips) and size designation - make it simple to access the right bit quickly.

Set contents:

897/4 IMP R Impaktor holder with retaining ring and ring magnet, 1/4" x 75 mm

05057676001

1x 1/4" x 75 mm

851/1 IMP DC Impaktor bits, PH 2 x 25 mm

1x PH 2 x 25 mm

1x PH 3 x 25 mm

855/1 IMP DC Impaktor bits, PZ 2 x 25 mm

1x PZ 2 x 25 mm

1x PZ 3 x 25 mm

867/1 IMP DC Impaktor TORX® bits, TX 20 x 25 mm

1x TX 20 x 25 mm

1x TX 25 x 25 mm

1x TX 30 x 25 mm

840/1 IMP DC Impaktor bits, 4 x 25 mm

1x 4 x 25 mm

1x 5 x 25 mm
