Series 900 – the Chiseldriver

The chiseldriver is the solution for jobs that require more than just screwdriving. For fastening, chiselling and loosening seized screws or hose clamps. With an integrated impact cap that extends service life and reduces the risk of splintering. With a pound-thru hexagon blade made from high-grade material for - zero-loss transfer of high forces when struck with a hammer. The tough viscous tempered material prevents the blade from splintering or breaking. More TORQUE can be transferred by attaching an open-jawed or ring spanner to the integrated hexagon bolster.

Kraftform Screwdrivers Series 100 VDE

Insulated Kraftform VDE slotted screwdrivers for safe working at up to 1000 volt. 160 iS with reduced blade diameter.

BiTorsion Bits

Peak forces that occur in power tool applications often result in premature wear of bits or damage to the screw head. This usually occurs during initial power-up and the when the screw comes to a standstill. Screwdriving could become more productive and safer if these peak loads could be minimised. The Wera BiTorsion system prevents premature wear. The service life of the tool is extended and the productivity of power tool applications significantly increased.

Bits and universal bit holder in Bit-Check

The Bit-Checks by Wera are extremely compact and are therefore the ideal companion for mobile applications.

Drinking bottle for outdoor activities

Elite Fly drinking bottle in Wera design with 550 ml capacity. Perfect for outdoor activities. Also fits in all standard bicycle water bottle cages.
