## L-Keys for Hexagon Socket Screws

**EAN:** 4013288098078 **Size:** 71x20x3 mm

Part number:05133153001Weight:5 gArticle number:950 PKSCountry of origin:CZ

Customs tariff 82041100

number:

- L-keys for hexagonal socket screws
- · Hexagonal ballpoint on the long arm
- Short design for particularly confined screwdriving situations
- L-keys with Hex-Plus advantage for a longer screw life
- High corrosion protection thanks to chrome-plating

High quality L-key with extra-short arm for use on difficult-to-access screws; for hexagon socket screws. The Hex-Plus profile offers a greater contact surface in the head of the screw. The notching effect is therefore reduced to a minimum and damage to the screw head more or less eliminated. The ballpoint on the long arm allows dependable working even in difficult installation situations. The precise chrome-plated design ensures high corrosion protection. Laser-engraved and thereby wear-resistant size markings on the L-keys for rapid accessing.

## L-Keys for Hexagon Socket Screws

We questioned the classic L-key

design, since all too often the

screw head recess is rounded out,

meaning screws can no longer be

tightened or loosened - and so the

user finds the L-key slipping out of

the recess. Wera Hex-Plus tools

have a larger contact surface in the screw head. The notching

effects are reduced and thereby

the deformation of the screws. At

the same time, as much as 20 %

more torque can be applied.

## L-Keys

## **Hex-Plus**

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

#### Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

#### Size identification

The size of each L-keys has been engraved by a laser. In addition Take it easy L-keys have a colour coding according to sizes - for simple and rapid accessing of the required tool. Making it easy to find the right tool.

## Surface protection

Chrome-plated hexagon L-keys for outstanding surface protection and long service life. High corrosion protection.
