The Hex-Plus profile of the L-keys reduces the damaging notch effect on screw heads due to larger contact surfaces in the screw head. Excellent corrosion protection thanks to the BlackLaser surface. The ball head on the long arm allows swivelling in all directions. The circular material used for the L-keys is gentle on the hand during use. Textile box pops up

Textile box for L-keys, which stands upright when opened

The textile box pops up when opened and the tools are quickly accessible.

L-keys with a thermoplastic sleeve

L-keys made from circular material fit into the hand better and allow less strenuous work over a longer period. Additionally, the rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. Colour coding and large stamp enable the desired L-key to be easily located. Moreover, the round material keys are more robust, particularly where smaller sizes are concerned.

Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus allows socket head screws to live longer!

Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

Take it easy tool finder system

With the Take it easy colour codes and size markings, the required size is found quickly.
