Safe storage and quick overview

The tools sit securely in the foam thanks to precise contour cutouts, but are easy to remove. The carefully designed arrangement of the tools ensures space-saving storage and quick access to each tool.

Two-coloured foam insert

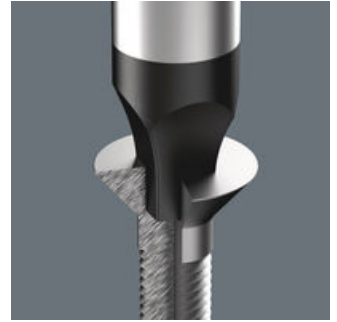

After removing the tool the light grey second foam becomes visible and therefore missing tools are quickly identified.

Lasertip prevents slipping out

A precisely-focused laser creates a sharp-edged surface structure. Wera Lasertip "bites" itself into the screw head and prevents any slips out of the recess. It is available for screwdrivers for slotted, Phillips and Pozidriv screws.

Wera Black Point tip

The Wera Black Point tip and a sophisticated hardening process guarantee a long usability for the tip, increased corrosion protection and exact fitting accuracy of the square head screwdrivers.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

Screwdrivers with Take it easy tool finder

Thanks to the colour coding and size stamping on the handle, the required tool can be found quickly.

Non-roll feature

The hexagonal non-roll feature prevents any rolling away at the workplace.
