Combination tool mounting

Zyklop Pocket

The magnetic direct mounting is suitable for 3/8" sockets as well as 1/4" bits without the need for an adapter.

With integrated bit magazine

A captive, freely swivelling bit magazine for 12 bits (1/4", 25 mm length) is integrated in the handle of the compact Zyklop ratchet.

Swivelling bit magazine

The swivelling bit magazine allows for the bits to be removed easily in almost any situation and cannot be lost. The bits are safely stored.

Freely pivoting ratchet head

The ratchet head pivots freely and can be locked into any defined position by using the slide switch that is positioned on either side. It is even possible to work in very confined and difficult-to-access areas with enhanced hand clearance. The predefined locking at 0°, 15° and 90°, both to the right and left, ensure safe working without any slipping of the ratchet head.

Locking the ratchet head

Thanks to the sliding switch on both sides, the ratchet head can be locked at the pre-defined positions 0° as well as 15° and 90° to the right and left.

Small return angle

The fine toothing with 72 teeth allows for a low return angle of only 5° for working in constricted screwdriving situations.

Simple direction change

The Zyklop Pocket ratchet can be quickly and easily reversed for clockwise/anti-clockwise rotation in any position using the knurl.
