- High-quality 15-piece universal tool set
- With exclusive W:O:A 3D label on the box and the Joker 15
- Perfect tool mix for outdoor use
- Compact box design at low weight

Born in Wacken on the "Holy Ground" of Heavy Metal!
With the 15-piece set Wacken 2 you are prepared for many adversities in the festival world, just like true Metalheads are. The bag fits in every backpack and the six bits in the Stubby magazine will save many a barbecue. The Hex-Plus L-keys not only look great, they also allow to reach the smallest corners, along with the screw. The headliner of this tool festival is the Joker family: Don't have the right size ready? No problem. The flexible mouth of the 6004 Joker is self-setting and adjusts effortlessly to all sizes between 10 and 13mm. The Joker 6003 manage to move every screw in tight spaces - thanks to a record-breaking return angle of 15°! The large Joker 6003 comes with a fancy W:O:A logo. A must for every Wackener and the continuation of a success story. Not only for collectors.

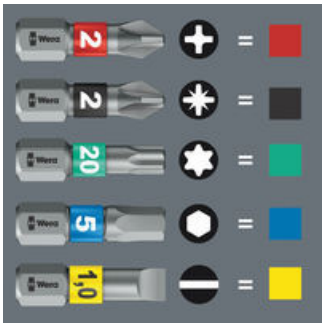
Compact shape

With its compact handle shape and the short blade, the Kraftform Stubbies are particularly suitable for working in confined screwdriving situations.

BiTorsion Bits

Peak forces that occur in power tool applications often result in premature wear of bits or damage to the screw head. This usually occurs during initial power-up and the when the screw comes to a standstill. Screwdriving could become more productive and safer if these peak loads could be minimised. The Wera BiTorsion system prevents premature wear. The service life of the tool is extended and the productivity of power tool applications significantly increased.

Bits with Take it easy tool finder

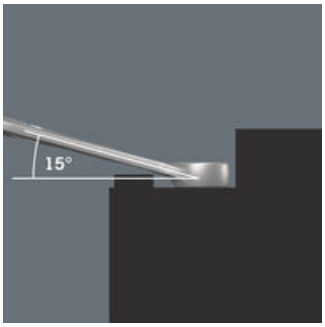


Take it easy tool finder with colour coding according to profiles and size stamp - for simple and rapid accessing of the required tool.

L-keys with a thermoplastic sleeve

L-keys with a thermoplastic sleeve are manufactured out of easy-to-grip, circular material. The sleeve ensures that work is safe and comfortable even at low temperatures. High corrosion protection features thanks to the special BlackLaser surface treatment. Colour coding and large stamp to enable the desired L-key to be easily located.

Joker 6003: Tilted ring side

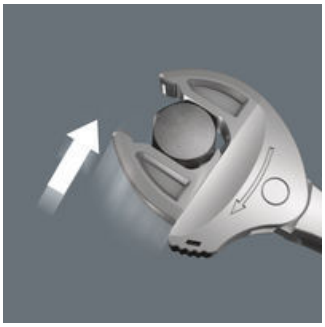


The ring side is tilted at 15° to the tool axis to prevent injury.

Joker 6003: For return angles of less than 30°

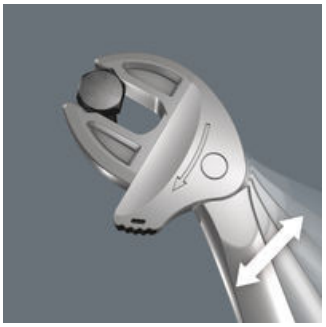
Thanks to the open end side offset by 7.5°, double hexagon geometry and an adjusted application method (placement - screwdriving - turning - replacement - screwdriving - turning, etc), even screwdriving challenges allowing a return angle of less than 30° can be solved.

Joker 6004: automatically and continuously self-setting



With its automatically and continuously gripping parallel jaws the Joker spanner 6004 covers all dimensions in the respective field of application. The tool automatically finds the required size when placed on the bolt or screw, no setting required.

Joker 6004: Ratchet mechanism for quick working



The ratchet feature in the jaw ensures fast and consistent screwdriving without removing the tool.
